## Falcon Lands on Luzon

The Philippines was one of the first places on the Sunda Plate, the plate tongue holding Indonesia, to start sinking this year, as was featured in this newsletter in [Issue 220](#) on January 4, 2011. But despite this early start in sinking, the top part of the Philippines, has never had a flooding problem! If all the flooding were due to rain, you might be selective that one portion of the Philippines gets flooded from a rainstorm but another seems immune? This week we focus with the recent passing of tropical storm Falcon. The lower part of Luzon island, affecting the city of Manila and the island, were drowning, over half a million people affected. Yet the northern part of the island was totally spared by an invisible rain barrier?

Pampanga in State of Calamity; 636 CL Villages Still Inundated

June 28, 2011

<http://www.mb.com.ph/articles/324597/pampanga-state-calamity-636-cl-villages-still-inundated>

*At least 636 villages in Central Luzon are still under floodwaters as local governments placed Tuesday*

*Pampanga and some parts of Bulacan under a state of calamity three days after tropical storm "Falcon"*

Floods Affect More than 500,000 in Central Luzon

June 25, 2011

<http://www.abs-cbnnews.com/nation/regions/06/25/11/floods-affect-more-500000-central-luzon>

*More than half a million people in Central Luzon are affected by floods caused by tropical storm "Falcon"*

*affected 112,515 families, or 550,686 people in Pampanga, Zambales, Bulacan, Nueva Ecija, Bataan,*

Note that the island of Luzon is not entirely on the Sunda Plate! The northern part of the island lies on the Philippine Plate. As proof that the massive flooding the Philippines has been enduring during 2011 has clearly been in great part on the Sunda Plate! Else why has the northern half of Luzon been entirely spared!

**IMAGE:** [Luzon Plates](#)

Where the folding of the Mariana and Philippine plates started on February 20, 2011, as noted in [Issue 229](#) of this newsletter, the folding process starts with the folding of the Mariana Trench, then the tilting of the Mariana Plate, and finally the tilting of the Philippine Plate. As the northern part of Luzon Island lies on the western edge of the Philippine Plate, eventually it will be sinking. But as the Falcon flew over Luzon, this time had not yet arrived.

**ZetaTalk Description 11/27/2010:** *The folding of the Pacific plates that accompany the sinking of Indonesia involves, as we have explained, the Mariana and Philippine plates tilting and flattening westward. The Pacific Plate is subducting under the Mariana Plate. The Pacific Plate curves down at this point where the Mariana Islands which ride on the Mariana Plate. The trench will be suddenly closed, so that rather than a temporary Pacific Plate scraping along the Mariana Plate, and giving the Mariana Islands a temporary boost up as the trench closes, the Pacific Plate will slide its western edge down along the Philippine Plate, as the Mariana Islands slide under the Philippine Plate and this process will now be accelerating. The Philippine Plate likewise tilts its edge*

western side down.

## Cornwall Tsunami

The Zetas have described the 7 of 10 scenarios that will result from the north Atlantic Rift ripping open after adjustment. Termed the European tsunami, this will result in tidal waves 200 feet tall assaulting the UK coast and the Bristol Channel due to tidal bore. This area, at Cornwall, thus takes the brunt of this tsunami, which is designed to affect the Atlantic coastline north and south of this point to a much lesser extent.

**ZetaTalk [Prediction](#) 10/16/2010:** *France can anticipate a tsunami of 100 feet, Spain perhaps 30-40 feet, the Norway 50-75 feet.*

On June 29, 2011 Cornwall had a tsunami. Though minor, there was no explanation for this, so the establishment says a landslide must have occurred somewhere off coast. There was no evidence for such a landslide, but to refer to the spreading Atlantic is forbidden. What else is left, then, to the cover-up as an explanation?

**IMAGE:** [Cornwall Tsunami](#)

Huge Underwater Landslide Causes 'Hair-Raising' Tsunami  
June 30, 2011

<http://www.dailymail.co.uk/sciencetech/article-2009446/Huge-underwater-landslide>

*A massive underwater landslide 200 miles off the coast of Cornwall caused a series of mini-tsunami waves that confirmed the extraordinary events were probably caused as a result of a landslide on the continental shelf off the Cornish coast. The mini-tsunami was recorded on tidal gauges from Cornwall to Hampshire which showed a column of water moved from west to east. Dr Martin Davidson, of the University of Plymouth, said the event was caused by a sand or mud slide at sea.*

But does this not conform to what the Zetas have described for the European tsunami? Per the Zetas, this is exactly the version of what is to come. Cornwall takes the biggest hit.

**ZetaTalk [Explanation](#) 7/2/2011:** *We have described the bulk of the 7 of 10 tsunami as striking the UK, where waves will be 200 feet high. Cornwall of course is at that location. What occurred here is a mini European tsunami, a tiny tsunami to come, due to a slight tearing in the central Atlantic Rift.*

## Noah's Arc

A man in the Netherlands has constructed a [Biblical sized arc](#), ala Noah's arc. Per the Zetas, the Netherlands will be hit during the pole shift, and well before this during the 7 of 10 European tsunami. Like Noah, Johan is trying to survive the flood, doing his part and risking ridicule.

**IMAGE:** [Johan's Arc](#)

Meet the Man Who's re-Creating Noah's Ark  
June 22, 2011

[http://today.msnbc.msn.com/id/43492787/ns/today-today\\_people/t/meet-man](http://today.msnbc.msn.com/id/43492787/ns/today-today_people/t/meet-man)

*Dutch builder Johan Huibers is expected to complete work on the massive vessel sometime next month on a staggeringly ambitious project to bring one of the best-known stories of the Bible to life. It's taken through \$1.6 million out of his pocket, but Huibers, owner of a successful construction company in Holland, says his dream will come true - literally. Despite his wife's misgivings, he built an ark in 2004 that was roughly half the size of the ark listed in the Bible. He guided the craft through the myriad canals of the Netherlands, and it proved successful. He says he was charged seven bucks apiece to climb aboard, that it financed Huibers' true dream - building Noah's Ark.*

as Noah's.

Per the [Kolbrin](#), a true account kept by the ancient Egyptians, Noah was a nobleman, wealthy, and thus had the

*It has been told to me in a dream that the ship should be built against the mountains, and the sea will come up to the mountains. The ship was for the beasts and cattle and their provender, and it was laid over with sand from the river. The middle of the ship was for the fowls, for plants of every kind that are good for man and beast, and the uppermost one was for the people. ... the ship was without mast or oars.*

Per the Zetas, the story of Noah is basically true. Just as today, when many contactees are giving The Call during a solar weather and seeing the Sun and Moon out of place, Noah likewise gave The Call.

**ZetaTalk [Explanation](#) 8/19/1995:** *The Flood occurred three pole shifts back, approximately eleven millennia ago. A highly Service-to-Other man, [Noah] gave The Call and received visits from a Spirit Guide who responded. He built a boat to save himself, his family, and household animals.*

Much has been made by the Zetas about survivors working together as a Service-to-Other community where everyone is sharing equally. Having a broad range of skills in the group is advantageous, and the Zetas stress that a skill is needed to survive. Per the Kolbrin, Noah was wise in this regard.

*Of all the people who entered with him, two understood the ways of the sun and moon and the ways of the year. One the quarrying of stones, one the making of bricks and one the making of axes and weapons. One the playing of music, one the making of bread, one the making of pottery, one the care of gardens and one the carving of wood and stone. One the making of tools, one the working of timbers, one the making of cheese and butter. One the growing of trees and plants, one the making of clothing, one the weaving of cloth and making of dyes, and one the brewing of beer. One the felling and cutting of trees, one the making of leather, one the dancing, one the mysteries of the scribe, one the building of houses and the working of leather.*

Note that Noah even including music, dancing, and beer making as skills to be carried forward. Per the Zetas, the world will be grim.

**ZetaTalk [Advice](#) 7/15/1995:** *It is no small matter to have music, poetry, and art. This fills the heart of the man as much as the recipient. There will be much need for such distraction, as the days will be dim, and the nights dark.*

Per the Zetas, Noah's ark has never been found nor will it be, as the wood was removed to build new housing. When the next coming pole shift will find they need to rebuild housing from whatever is at hand, Noah was resourceful, turning the ark into housing for his family and household staff.

**ZetaTalk [Explanation](#) 1/24/2009:** *Noah's Ark has never been found nor will it be. The displacement wave that hit the Gulf from the vicinity of Antarctica rose into a tidal bore as it tore into the region of Turkey and Iran. The ark was on the highlands where the Ark found the water no longer supporting it, being left high and dry as the waters receded. The ark was abandoned but the search should concentrate on rolling hills, not mountain tops. It was abandoned, and its wood removed to other places, and thus no trace of it remains today.*

## Seaway Stretch

As S America begins her rolls to the west, pushing over the Cocos and Nazca plates, and as the northern Pacific and American continent is placed under an ever increasing bow. The primary stress is along the Seaway, which runs from the Gulf of Mexico and along the New Madrid fault line, but points west are also affected. That this stress is increasing can be seen in the sinkholes and collapsing houses in the Seaway stretch zone.

**ZetaTalk [Prediction](#) 9/25/2010:** *The New Madrid runs up along the Seaway, to the mouth of the Seaway, and*

land it passes through. This most certainly can affect a broader area than just the fault line. We have stated the most in this regard.

**ZetaTalk Prediction 3/12/2011:** Sinkholes and crevasses will proliferate throughout the US in her stretch zone from the New England states south to the tip of Florida and all points west. This is a large bow.

**IMAGE:** [Seaway Stretch](#)

Giant Sinkhole in Manitoba

June 11, 2011

<http://readreidread.wordpress.com/2011/06/11/giant-sinkhole-in-manitoba/>

*The sinkhole is huge, more than fifty feet deep in some places, it covers about three acres (the size of football fields, no end zones) and it appears to have dropped right down.*

Still no Cause for Freeport Building Collapse

June 16, 2011

<http://www.wrex.com/Global/story.asp?S=14921972>

*Investigators are still trying to figure out what made the building suddenly collapse.*

Cleveland: St. Clair Crack Remains a Mystery

June 30, 2011

<http://www.wkyc.com/news/article/195939/45/Cleveland--St-Clair-crack-remains>

*It's about 2 inches wide and just as deep, stretching from Ontario to East Sixth Street and running through the Medical Mart construction. Fear of the unknown may run much deeper.*

Ottawa: Downpour Causes Luskville 'Canyon'

June 27, 2011

<http://www.ottawacitizen.com/columnists/Downpour+causes+Luskville+canyon/>

*A piece Highway 148 near Luskville is now a canyon 18 metres deep. The large pipe that ran under the road seems to have been blocked at the intake. The torrents of water late last week stressed the situation and the ground above the pipe became waterlogged and gave way.*

Cincinnati: Crews Working to Repair Union Twp Sinkhole

June 23, 2011

<http://cincinnati.com/blogs/considerthisclermont/2011/06/23/crews-working-to-repair>

*The hole was created after a 48-inch pipe broke during the rain. The hole is 20 feet wide and 18 feet deep.*

Sinkhole in South Dakota Claims Two Lives

June 22, 2011

<http://www.wday.com/event/article/id/48250/group/homepage/>

*Torrential rains led to high water near the highway and that water weakened the road, creating the sinkhole over the road and two drivers attempted to cross the flooded roadway, not knowing that the ground beneath them gave out.*

Cincinnati: Anderson Township Sinkhole Grows After Massive Rains

June 22, 2011

<http://www.local12.com/news/local/story/Anderson-Township-Sinkhole-Grows>

*It's believed that beneath the hole is a damaged eight foot wide drain pipe.*

Cleveland: Collapse of Old Sewer Tunnel Segment

June 21, 2011

[http://blog.cleveland.com/metro/2011/06/collapse\\_of\\_old\\_sewer\\_tunnel\\_s.html](http://blog.cleveland.com/metro/2011/06/collapse_of_old_sewer_tunnel_s.html)

*The collapse of an aging underground water/sewer tunnel section is to blame for a yawning chasm that has opened up. It's uncertain what caused the tunnel segment to crumble, but suspect it was age.*

Mount Carmel Ohio: Giant Sinkhole Affecting Residents of Clermont Co. Neighborhood

June 22, 2011

<http://www.fox19.com/story/14954392/giant-sinkhole-opens-up-in-u>

*The hole started as only about 4 to 5 feet wide, but has grown to about 20 feet wide and about 8 to 10 feet deep.*

Weather and Workmanship likely Brought Down Clinton House

June 2, 2011

<http://www.wqad.com/news/wqad-house-sinks-clinton-060211,0,4631204.story>

*An elderly Clinton, Iowa man is staying with relatives after a sink hole contributed to bringing down his house.*

NY: Holy Hole!

June 1, 2011

<http://tonawanda-news.com/local/x1326417957/Holy-hole>

*A faulty sewer line 25 feet beneath the street may be the cause of a sinkhole - 12 feet wide and 20 feet deep.*
