Living in the Flood Zone

Uncertainty, sorting out the truth from the lies the establishment keeps spouting, and disease. Lots of disease. In large cities, everything is compounded. Raw sewage is in the water. Electrocuting from live wires under water is very real. The smell is everywhere. Water born disease proliferates. Yet the citizens stay, as this was their life, and their governments are telling them that life will go back to normal. In Bangkok, so aptly pointed out by a well maintained [Pole Shift ning blog](#), sinking is so rapid that a map showing the flooded districts between November 3, 2011 and the next day, November 4, 2011 shows a progression for a single day, the city of 12 million and its coastline visibly going under. If this were merely water from the interior, then why are parts of the coastline sinking? The flooded coastline is not even connected to the interior floods. Bangkok is sinking.

Subway at Risk from Advancing Floods

November 4, 2011

<http://www.bangkokpost.com/breakingnews/264764/bangkok>

About 20 per cent of the capital is now submerged in floodwater contaminated by rubbish, dead animals and industrial waste, raising fears about outbreaks of disease in the densely populated metropolis of 12 million people.

Electrocution Warning as Thai flood Toll Spikes:

November 2, 2011

http://www.channelnewsasia.com/stories/afp_asiapacific/view/1163088/1/.html

While the centre of the capital Bangkok remains dry, residential areas in its outskirts and to the north have been submerged in water up to people's waists or even deeper as runoff creeps south from the central plains.

In Viet Nam the lands are destined to sink to the 40 foot level, as is Bangkok, and are steadily sinking. Ulcers, mold, contaminated drinking water and a foul smell everywhere. That's living in the flood zone in Viet Nam. Once again those areas destined to sink per the ZetaTalk prediction are those struggling with flooding. South Viet Nam is sinking. Cambodia has turned into an inland lake, the people in despair, without rescue.

Rising Tides, Saigon's Reeling in Sea Water

October 28, 2011

<http://www.khoahoc.com.vn/doisong/moi-truong/tham-hoa/>

Local people said that in two days, the area has suffered three waves of unusually high tides rise.

Flooding in Recent Months

November 1, 2011

<http://www.thanhtra.com.vn/tabid/77/newsid/47051/temidclicked/34/>

Limb ulcers, contaminated drinking water, clothing, housing mold. Most families here are outdoor toilet. The toilets are so immersed in water inundation of habitat as that of people suffering from severe pollution, serious effects on health. Deep water as well as the source of contaminated well water, water cloudy and often foul fishy smell of mud.

More Than 1 Million Cambodians Struggling Against Floods

November 2, 2011

<http://tintuc.timnhanh.com/the-gioi/chau-a/20111104/35ABF19C/>

According to UN estimates, floods have affected three quarters of land in Cambodia and about 1.2 million of the country's 15 million people. Flood plains turned into vast lakes. Buffaloes, cows, pigs, chickens were herded together on the crowded strip dirty. The people of Cambodia are grappling with very difficult life and the majority in a state of despair.

Is it a coincidence that only these parts of Asia are having what is termed "high tides" or alternatively have problems with sinking due to pulling drinking water out of the ground? Why only these regions on the Sunda Plate where the sinking predicted by the Zetas is picking up speed? This is what the establishment would have you believe.

Asia Pays Watery Price for Overdevelopment

October 26, 2011

<http://globalnation.inquirer.net/16325/asia-pays-watery-price-for-overdevelopment>

Similar subsidence and sea-water encroachment is occurring in Jakarta, Ho Chi Minh City and Manila, where a typhoon last month triggered the worst flooding in the Philippine capital for decades.

The news reported in March, 2011 that 40% of North Jakarta was below sea level. This has now moved by the end of October, 2011 to be 70% of North Jakarta below sea level. Living in the flood zone there is reported to be producing diarrhea, rashes, and coughs.

70 Percent of Flood Prone Areas Koja

October 28, 2011

<http://www.poskota.co.id/berita-terkini/2011/10/24/70-persen>

North Jakarta nearly 70 percent of its territory, under the sea. In the event of rain or high tide, the area is always flooded area with an average altitude of nearly 30 to 50 cm.

Flood Victims Begin Esophageal Disease

November 1, 2011

http://www.beritajakarta.com/2008/id/berita_detail.asp?idwil=1&nNewsId=46961

Most complained of diarrhea, inspection of upper respiratory tract, rashes, coughs and colds.

West Sumatra is on the sinking edge, where the Sunda Plate dips down and under the curve holding Sumatra and Java. Suddenly, even admittedly without much rain, Sumatra is again sinking. The permanent lose of elevation brings immense devastation to those whose homes and farms and roads are inundated - homes and bridges swept away, education of children disrupted, and crops ruined so starvation is inevitable. Neighbor would help neighbor, but when all are affected, all suffer and no help arrives.

IMAGE: [Indonesia Sinking](#)

Start Flooding Spreads in Indonesia

November 2, 2011

<http://us.headlines.vivanews.com/news/read/261618-banjir>

Indeed, the floods that occurred during the transition season from dry to wet. Today, still not high rainfall intensity. Rainfall, is still quite normal.

Coast of West Sumatra flood Victims Swallow

November 2, 2011

<http://www.bisnis.com/articles/banjir-pesisir-sumbar-telan-korban>

10 districts are affected with 45% area inundated by 0.5 to 1.5 meters high. The activity of 18, 000 school students are

paralyzed, 51 houses were swept away, 21 homes were severely damaged, 73 homes were damaged, 201 houses slightly damaged, 10,219 houses inundated, 9 schools were severely damaged, severely damaged 27 houses of worship, two broken bridge, 4 bridges hanging broken, damaged state road 750 meters, 700 hectares of crops, and 121 hectares of rice fields flooded.

Per the Zetas, most living in the flood zone will cling and try to return to their former lives, even if this is not possible.

ZetaTalk [Comment](#) 10/15/2011: *Meanwhile the cities of southeast Asia will be soggy, water in the basements, water undermining the foundations so the buildings begin to sag and lean. Certainly rot and mold will be rising, as well as water born illness and parasites and snakes, plagues all. Those trying to continue life as before will finally be forced to leave these cities, or move to higher ground nearby. Those governments trying to hold the line on the cover-up over the presence of Planet X will continue to talk in terms that had meaning in the old days. More dykes, more sand bags, cleaning the drains or dredging the rivers, more pumps, and that it will all drain in time. And this drama of clinging to the old while refusing to face the new will continue elsewhere around the globe.*

Military Millay Panic

Why would the FBI and the Army Counterintelligence unit pounce on a MP from Owensboro, KY, accusing him of espionage when he didn't even have access to classified information? The announcement of the arrest was reported on Fox, CNN, MSNBC, and various other military and major media outlets! Where the arrest can be confirmed, the reason for the arrest cannot but is rumored to be related to troop movements and their relationship to the timing of the end of the world. Certainly it is no secret that our email and phone calls are monitored, and key words and phrases trigger further investigation. If troop movements would be a clue to what the establishment *knows* about the pending pole shift, then such discussions from enlisted folk might be forbidden. Specialist William Millay of Owensboro, KY is now acutely aware of this, presumably.

IMAGE: [Spc. Millay](#)

US Military Officials: Arrested Soldier is Not a Spy

November 2, 2011

http://www.msnbc.msn.com/id/45134188/ns/us_news-security/

Officials say that although Spc. William Colton Millay, who was serving as a military policeman, had a standard security clearance, he did not possess or have access to sensitive classified material. He allegedly offered to sell classified information to an undercover police officer.

UCMJ Charges Expected in Espionage Case

November 1, 2011

<http://www.armytimes.com/news/2011/11/army-millay-richardson>

Millay was arrested at Elmendorf-Richardson on Oct. 29 as the result of an ongoing FBI and Army Counterintelligence investigation, but declined to explain the circumstances that led to Millay's arrest.

What *would* troop movements reveal? Per the Zetas, the US military has long since determined their action plan as the Earth changes increase. They would bring the troops home, almost in stealth mode, without fanfare, leaving a skeleton crew on bases overseas. The troops would be needed at home, and sending them home to be with their families when the time came would prevent mischief, ala rogue armed units establishing fiefdoms.

ZetaTalk Prediction 10/11/2003: *The war games discussed during the NATO exercises included disasters equivalent to those we have predicted for the pole shift, immense devastation sparing none. In the event that such a scenario ensues, increasing volcanic eruption, quake torn roads and crumbling cities, mass populations homeless and roving the countryside, how should treaties installing the US Military in bases around the world be viewed? In the event of such earth changes, troops would be brought home, under stealth and with little fanfare, to the respective homelands, leaving at most a skeleton crew at the bases.*

ZetaTalk Prediction 12/15/2001: *What would the attitude of the soldier be, if starvation were rampant, news of this coming from home? The military knows this, discusses this, endlessly. They have great history to examine. Martial Law in the US is not expected. We anticipate, rather than a Martial Law setup, that troops will be sent home just ahead of the shift, to be with their families. In this way, they will be disbanded, less of a threat, and more likely to assist their families than run as gangs.*

That said, what *is* the current status of troop movement, stealth or not? The troops *are* coming home from the wars, by the end of 2011 for Iraq and by mid-2012 for Afghanistan.

Obama Announces Iraq Troop Pullout by End-2011

Oct 21, 2011

http://www.spacewar.com/reports/Obama_announces_Iraq_troop_pullout

President Barack Obama said Friday all US troops will leave Iraq by the end of the year.

War in Afghanistan

http://en.wikipedia.org/wiki/U.S._invasion_of_Afghanistan

The cost of the war reportedly was a major factor as U.S. officials considered drawing down troops in 2011. On June 22, 2011,

President Obama announced that 10,000 U.S. troops would be withdrawn by the end of 2011. An additional 23,000 troops will leave the country by the summer of 2012.

EAS Coincidence

Was it the relationship to a passing asteroid, scheduled to zip between the Earth and Moon on November 9, 2011, and a simultaneous Emergency Alert System?

Huge Asteroid Headed for Close Encounter with Earth

November 4, 2011

<http://ca.news.yahoo.com/huge-asteroid-headed-close-encounter-earth-185047555.html>

It is the first time since 1976 that an object of this size has passed this closely to the Earth. The orbit and position of the asteroid, which is about 1,312 feet in diameter, is well known.

FEMA, FCC Announce Nationwide Test Of The Emergency Alert System

June 9, 2011

<http://www.fema.gov/news/newsrelease.fema?id=55722>

The U.S. Department of Homeland Security's Federal Emergency Management Agency (FEMA) and the Federal Communications Commission (FCC) will conduct the first nationwide test of the Emergency Alert System (EAS).

Per the Zeta, this is *not* a coincidence, and shows how nervous the US government is about the public getting wise to the near presence and pending passage of Planet X.

ZetaTalk [Comment](#) 11/12/2011: *The Obama administration has given many clues that it is getting ready for disasters within US territories. FEMA has been intensely busy. We mentioned in July, 2010 that they were [developing a plan](#) to house and feed millions of homeless, and by August, 2011 [Executive Order 13575](#) was issued, documenting the plan we described. In May, 2011 [the PLAN system](#), whereby the Obama administration could text directly to mobile phone holders was implemented. How is yet another EAS test any different? It is bigger and more comprehensive, as is appropriate for a country preparing for the disasters we have described. Is there any relationship between the date of the EAS test and the passage of an asteroid passing between the Earth and Moon? Both are scheduled to occur on November 9, 2011. The asteroid, Asteroid 2005 YU 55, long known to NASA, is not a surprise, and its pending passage allowed the date of the EAS test to coincide. The passage is being used, in part, as an excuse for the need for such a nationwide system, a nationwide test. Since both will be in the news on the same day, the public is expected to make the connection. In*

this way, it is hoped, the connection to the rising increase in earthquakes and peculiar signs in the skies will not be made.

Mars Water

At the start of the ZetaTalk saga in 1995, the Zetas stated that Mars had once had oceans and atmosphere, but that the Annunaki had used the water to wash their gold ore, sending this down into underground caverns.

ZetaTalk [Statement](#) 7/15/1995: *Mars today is a dead planet, but in the recent past this was not the case, as evidenced by the weathered structures on Mars reminiscent of the Great Pyramids and the Sphinx. In the past, Mars sustained life to a level not unlike our home in Zeta Reticuli - moss and insects and worms. Mars met its demise as a result of visitors from the Planet X, who set up mining operations on Mars in preference to Earth where large carnivorous mammals roamed about in great numbers. Where the atmosphere on Mars was thin, it was ample, so the visitors set about using what water resources they could muster to wash the ore they were after. In so doing they sought to control the run-off on the relatively flat surface of Mars, and did so in a thoughtless manner by directing waste water down a culvert. Thus precious water increasingly was sent underground, and a chain of events was set in motion that could not be reversed. Soon the atmosphere was too thin to breathe.*

Since 1995 NASA has periodically announced findings that support the Zeta statement. First, [admitting in 1999](#) that Mars indeed had surface water. But it took them until November 2, 2011 to announce that this water had flowed underground. Dare we say it, Zetas right again!

IMAGE: [Mars Oceans](#)

Where'd All that Mars Water Go? Maybe Underground

November 2, 2011

<http://www.msnbc.msn.com/id/45139654/ns/technology>

Astronomers have found more evidence that Mars was wet and warm in the ancient past, but the discovery comes with a twist: The water may have flowed below the Martian surface, rather than on top of it.

NASA Study of Clays Suggests Watery Mars Underground

November 2, 2011

<http://www.jpl.nasa.gov/news/news.cfm?release=2011-337>

Discovery of clay minerals on Mars in 2005 indicated the planet once hosted warm, wet conditions. If those conditions existed on the surface for a long era, the planet would have needed a much thicker atmosphere than it has now to keep the water from

evaporating or freezing. Researchers have sought evidence of processes that could cause a thick atmosphere to be lost over time. Clays form from the interaction of water with rock. Different types of clay minerals result from different types of wet conditions.
